# *Creating an Avatar with HeyGen AI*
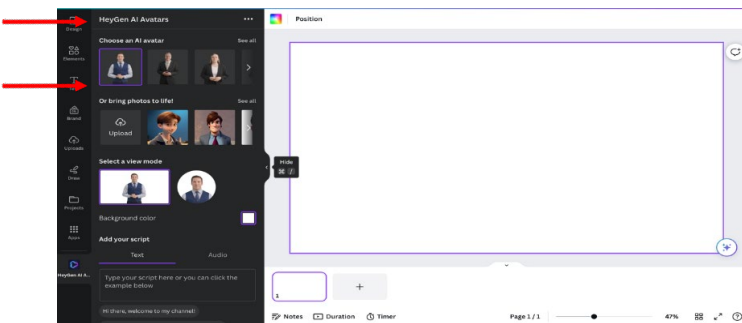

1. Go to canva.com OR HeyGen AI.
2. Sign in using gmail or your school email.
3. In HeyGen AI, click on "**Avatar**" and follow these instructions starting with step #6. In Canva, find and click on the purple **Create a Design** button and then click **Presentation** in the dropdown menu.

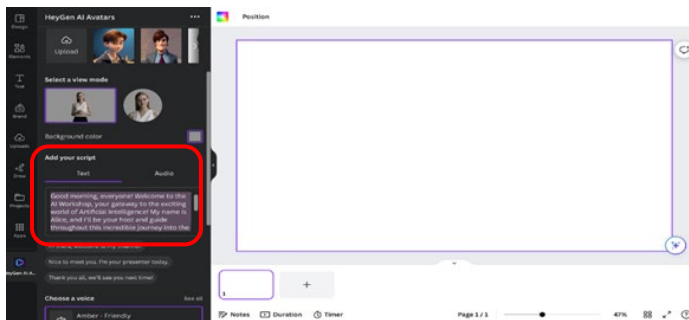

You can also click on the orange **Presentation** button in the middle of the screen instead.

4. Click on **Apps** in the left menu, then scroll down to *"AI Powered"* and click on **HeyGen AI Avatars**.
5. Click the purple **Open** button and scroll down to click on **Sign in/ Sign up.**
6. After signing in, click on the avatar that you want to use or "**upload**" your photo.

7. Choose the background you want to use. Then, write a script for your video exactly as you want your avatar to say it.

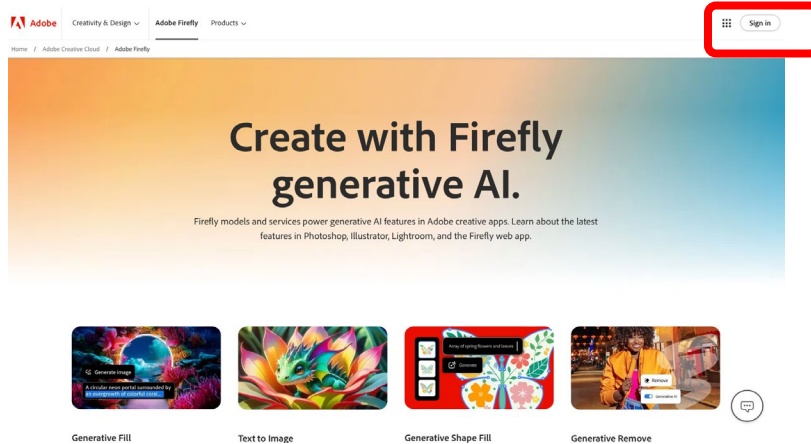

8. Click on the purple **Generate AI video** button.

You can **edit** the video, **crop,** or **put filters** before finalizing.
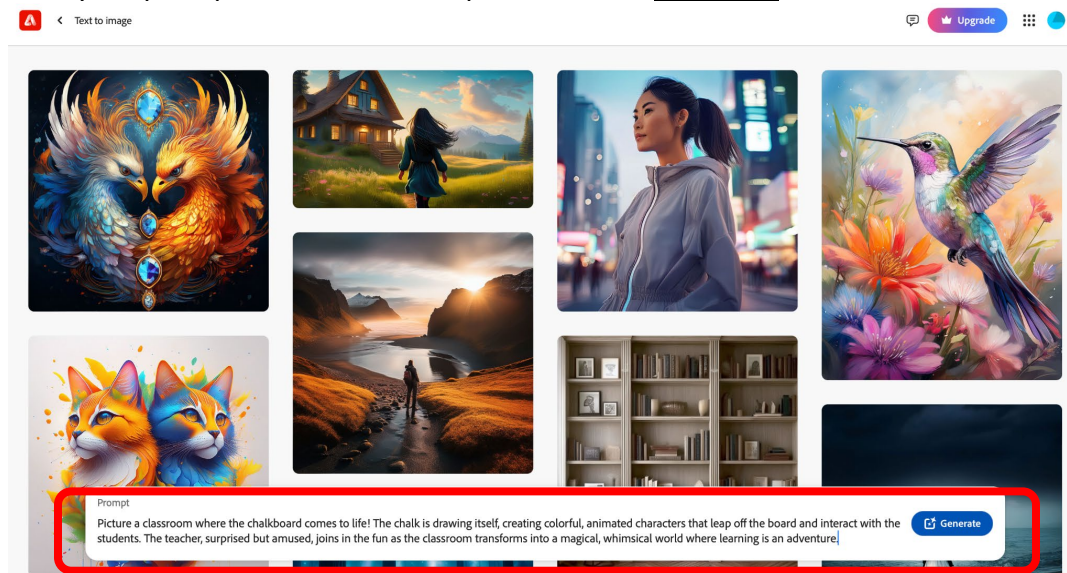

Handout #2
Creating Images with ADOBE FIREFLY AI

1. Go to **Adobe Firefly** (https://firefly.adobe.com/)
2. **Sign in** using gmail or your school email.

3. Find the *Text to Image* feature and click **Create with Firefly**.

4. Write your prompt in the available space and click **Generate.**

5. The AI will generate four different designs. Choose yours by downloading the image.
